if "Other", Explanation: _____

Description of Project

The USC Depart of Physics & Astronomy has a collection of ~4,500 8mm tapes that contain solar images taken from the Solar Tower at the Mt. Wilson Observatory. The images were written to the tapes over a span of several years and have been maintained by the Department.

Additional information

IM will receive the media at the production lab in Atlanta GA. Restoration is anticipated to take six (6) months to complete.

Data will be landed on a RAIDed NAS (20TB) and be delivered back to the Customer.
Restoration would include up to 5 retries with various known recovery techniques per tape as required.

It is suggested that the data be backed up to LTO media for long term preservation.
